RESOURCE® HERBICIDE FIELD CORN AND SOYBEANS

EPA Reg. No. 59639-82

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL AND PAMPHLET. USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

APPLICATION INFORMATION FOR TANK MIXES IN FIELD CORN

Apply RESOURCE at 4 to 8 fl. oz./A to control the weeds listed in Table 1 on the product container label. To control additional weeds in field corn, RESOURCE may be tank mixed with approved herbicides. Approved tank mix herbicides are indicated in Table 2 on the product container label as well as additional tank mixes listed in Table 1 of this supplemental label. For best results, RESOURCE tank mix applications should be made to actively growing weeds. Do not apply RESOURCE tank mixes during periods when field corn and/or weeds are under stress or when conditions do not favor active weed growth. For maximum control, weeds must receive thorough spray coverage.

Crop response from RESOURCE tank mix applications may be greater than that occurring from RESOURCE applied alone. Crop response from RESOURCE is temporary and does not adversely affect crop yield when applied according to the label use directions.

Always read and follow label directions for all tank mix products before using. The most restrictive labeling of any tank mix product must be followed. RESOURCE, when applied according to label use directions, will control the weeds listed in Table 1 of the product container label. This label makes no claims concerning control of other weed species.

BASIS GOLD®
ROUNDUP ULTRAMAX™ (5 SC) ⁽¹⁾

⁽¹⁾Use only on varieties legally designed as "ROUNDUP READY®".

APPLICATION INFORMATION FOR TANK MIXES IN SOYBEANS

Apply RESOURCE at 4 to 12 fl. oz./A to control the weeds listed in Table 4 on the product container label. To control additional weeds in soybeans, RESOURCE may be tank mixed with approved herbicides. Approved tank mix herbicides are indicated in Table 5 of the product container label as well as additional tank mixes listed in Table 2 of this supplemental label. For best results, RESOURCE tank mix applications should be made to actively growing weeds. Do not apply RESOURCE tank mixes during periods when soybeans and/or weeds are under stress or when conditions do not favor active weed growth. For maximum control, weeds must receive thorough spray coverage.

Crop response from RESOURCE tank mix applications may be greater than that occurring from RESOURCE applied alone. Crop response from RESOURCE is temporary and does not adversely affect crop yield when applied according to the label use directions.

Always read and follow label directions for all tank mix products before using. The most restrictive labeling of any tank mix product must be followed. RESOURCE, when applied

according to label use directions, will control the weeds listed in Table 4 of the product container label. This label makes no claims concerning control of other weed species.
