PEST	PRODUCT RATES OZ/ACRE	SPECIAL INSTRUCTIONS
Two-spotted Spider Mite	2.0 to 3.0	<p>Apply with air or ground equipment in adequate water for uniform coverage (3 to 10 gals/A by air or 10 to 50 gals/A by ground). Coverage is essential for good control. Use of higher water volume will assure better coverage.</p> <p>Best results are achieved when mite populations are low. <i>Zea/ Miticide¹</i> is predominately an ovicide/larvicide. Apply <i>Zea/ Miticide¹</i> at or prior to threshold for your area but not greater than the maximum rate listed.</p> <p>Do not use below use rate 2.0 oz/A (0.09 lb ai/A) as this may result in poor control and contribute to the development of resistance to etoxazole among mite populations.</p>

Restrictions

- Do not apply within seven (7) days of harvest.
- Do not make more than one (1) *Zea/ Miticide*¹ application per season.
- Do not apply more than 3.0 oz of *Zea/ Miticide*¹ per acre per season.

MANAGING RESISTANCE: Repeated use of the same class of miticides or miticides with similar modes of action can lead to the buildup of resistant mite strains. *Zea/ Miticide*¹ should be used in alternation with other miticides possessing dissimilar modes of action and/or with other chemical classes of miticides. Follow local, state and federal Integrated Pest Management (IPM) and Resistance Management (RM) recommendations. Read and follow all product labels before applying any miticide.
