

SUREGUARD: JUST THE FACTS

FORMULATION: 51% WDG

ACTIVE INGREDIENT: Flumioxazin

USE RATE: 8–12 ounces of product/A

CROPS: Field-grown ornamentals, including conifers, Christmas trees, deciduous trees and bareground applications

TIMING (application window): Can be applied anytime prior to weed emergence

RESIDUAL ACTIVITY: 8–16 weeks of control

RESTRICTED ENTRY INTERVAL (REI): 12 hours

SureGuard[®]

HERBICIDE

- Binds to soil for unsurpassed residual control, reducing applications, saving time and money
- Sprayable, broad spectrum preemergence herbicide controls broadleaf and grassy weeds
- Superior preemergence control of chickweed, groundsel, pigweeds, spurge, lambsquarters, bittercress, oxalis, crabgrass, liverwort and even triazine- and ALS-resistant weeds
- Wide application window allows flexibility for seasonal treatments
- Excellent tank mix partner with glyphosate for quicker and more effective postemergence broadleaf weed control
- Helps maintain bareground non-crop areas that must be kept weed-free

LET'S GROW YOUR BUSINESS.™

Running a business isn't easy. At least you can mark "weed control" off your to-do list. *SureGuard* Herbicide not only stops a broad spectrum of problem weeds, it delivers beautifully predictable, long-lasting preemergence control. Which frees you up to concentrate on more important things. Like the reason you started this business in the first place.

SureGuard[®]

HERBICIDE

Let's grow your business.™

The nursery business has its share of obstacles.

YOUR HERBICIDE SHOULDN'T BE ONE OF THEM.

**Healthier ornamentals.
For a healthier business.**

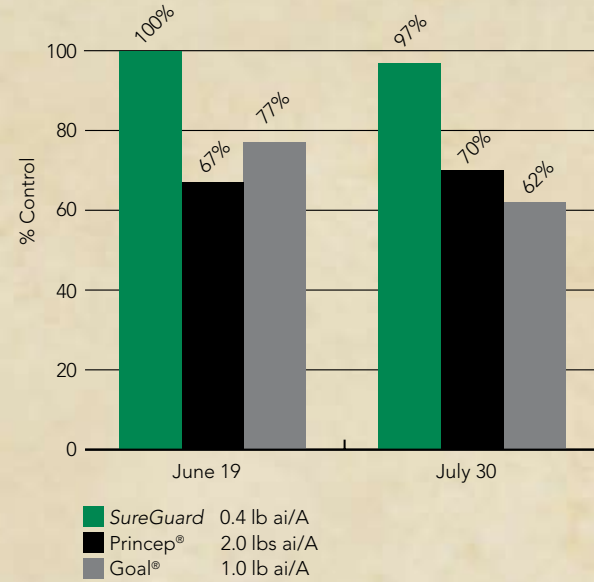

Your plants are your livelihood. Protect them with the most powerful and long-lasting preemergence herbicide available. SureGuard® Herbicide targets a broad spectrum of hard-to-control weeds—even resistant varieties. Tough weeds like chickweed, groundsel, pigweeds, spurge, liverwort and more. In short, *SureGuard* takes care of weeds for a long time. So you can take care of business.

Residual that works the same way you do: Overtime.

It's a fact: *SureGuard's* residual control lasts up to 4–6 weeks longer than the competition, actually reducing the number of applications and saving you time and money. After all, you never take off work. Neither should your herbicide.

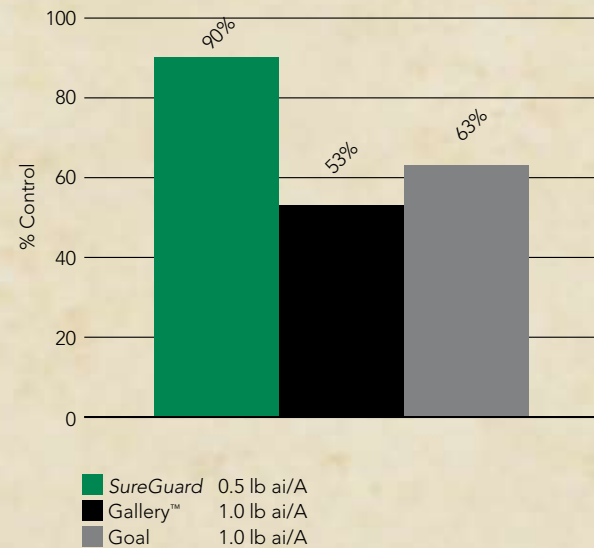

CONTROL OF HOARY ALYSSUM

Dr. Rob Richardson, Michigan State University

CONTROL OF ASIATIC DAYFLOWER

Dr. Larry Kuhns, Pennsylvania State University

**You don't need more herbicides.
You just need a better herbicide.**

With unsurpassed weed control, including winter annual weeds, *SureGuard* actually reduces the number of herbicides you need. And *SureGuard's* unique chemistry provides quicker burndown and outstanding postemergence broadleaf control when partnered with glyphosate.

**Control weeds on your schedule.
Not theirs.**

A flexible application window lets you apply *SureGuard* any time, fall or spring, before weeds emerge—without sacrificing control. The sprayable, non-volatile and non-restricted-use formulation means even fewer headaches, and a low use rate means more control for the money.

RESIDUAL WEED CONTROL

SureGuard provides excellent broad spectrum weed control that lasts.
