

TREATED SEED

This seed has been treated with INTEGO® SUITE Cereals OF which contains clothianidin, ethaboxam, metalaxyl and metconazole.

**DO NOT USE TREATED SEED
FOR FEED, FOOD OR OIL PROCESSING**

STORE AWAY FROM FEEDS AND OTHER FOODSTUFFS

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

- Wear long-sleeved shirt, long pants and chemical-resistant gloves made of any waterproof material such as barrier laminate, butyl rubber ≥ 14 mils, nitrile rubber ≥ 14 mils, neoprene rubber ≥ 14 mils, natural rubber ≥ 14 mils, polyethylene, polyvinyl chloride (PVC) ≥ 14 mils or Viton ≥ 14 mils when handling treated seed.
- Regardless of the type of application (seed treatment, soil or foliar), do not apply more than a total of 3.2 oz (90.7 gram) clothianidin (active ingredient) per acre per year.
- Excess treated seed may be used for ethanol production only if (1) by-products are not used for livestock feed and (2) no measurable residues of pesticide remain in ethanol by-products that are used in agronomic practice.
- Dispose of all excess treated seed. Leftover treated seed may be double-sown around the headland or buried away from water sources in accordance with local requirements.
- Do not contaminate water bodies when disposing of planting equipment washwaters.
- Treated seeds must be planted at a minimum depth of 0.5 inch.
- This compound is toxic to birds and mammals. Clothianidin-treated seeds exposed on soil surface may be hazardous to birds and mammals. Cover or collect seeds spilled during loading.
- This compound is highly toxic to bees exposed directly (contact). Ensure that planting equipment is functioning properly in accordance with manufacturing recommendations to minimize seed coat abrasion during planting to reduce dust which can drift to blooming crops or weeds.
- Do not re-use bags from treated seed to handle food or feed products.
- Dispose of seed packaging in accordance with local requirements.
- After seeds have been planted, do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours. Exception: Once seeds are planted and covered by soil or other planting media, the Worker Protection Standard (WPS) allows workers to enter the treated area without restriction.
- Areas planted with treated seed of barley, oats and wheat may be replanted immediately with bulb vegetables, canola, cereal grains (except rice), cotton, fruiting vegetables (including cucurbits), leafy vegetables (including brassica vegetables), rapeseed, root and tuber vegetables and soybean. These areas may also be replanted after 30 days with dry beans, grasses, non-grass animal feeds and rice. These areas may also be replanted after 8 months with sugarcane. Do not plant any other crop in the treated area for at least one year after these treated seeds are planted.
