FOR DISTRIBUTION AND USE ONLY WITHIN THE STATES OF ALABAMA, FLORIDA, GEORGIA AND SOUTH CAROLINA

ZEAL® MITICIDE® FOR CONTROL OF PECAN LEAF SCORCH MITE IN PECAN

THIS FIFRA SECTION 2(EE) EXPIRES DECEMBER 31, 2015

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA. This 2(ee) recommendation contains directions for use which do not appear on the package label and must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions and precautions on the EPA registered label when using Zeal Miticide®.

**Application:** Apply with an air-blast sprayer at a minimum of 100 gals/A of water. Applications of Zeal Miticide® must be made using enough carrier (water) to ensure thorough coverage of the foliage, which mites use for dispersal, feeding and reproduction. Best results are achieved when mite populations are low at application. Zeal Miticide® is predominately an ovicide/larvicide. Use the higher rate when populations are high and damage is visible.

**USE RESTRICTIONS**

1. Pre-harvest interval (PHI) is 28 days.
2. Do not make more than one (1) application of Zeal Miticide® per season.
3. Do not apply more than 3.0 oz/A of Zeal Miticide® per acre per season.
