

Soybean Cyst Nematode Protection You Can Depend On

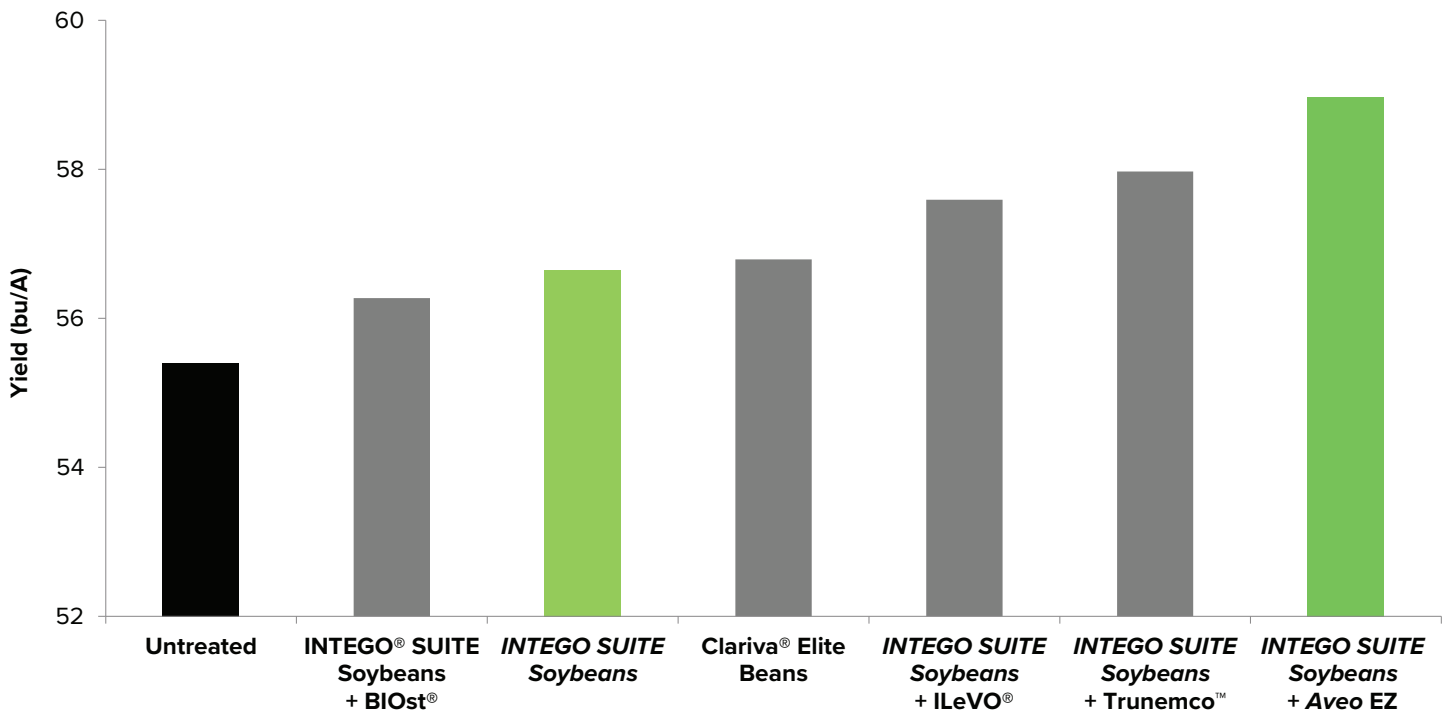

Aveo® EZ Nematicide is a seed treatment solution to help growers protect their soybean fields from nematodes, including soybean cyst nematode (SCN). With its highly concentrated formulation, Aveo EZ offers dependable protection to help enhance and protect the plant's genetic resistance. The low use rate and flexibility to use as a stand-alone product makes Aveo EZ an easy-to-use option that provides proven SCN protection.

- ▶ Proven consistent field performance
- ▶ Stand-alone product provides flexibility to use when needed
- ▶ Colonizes the plant roots for season-long protection

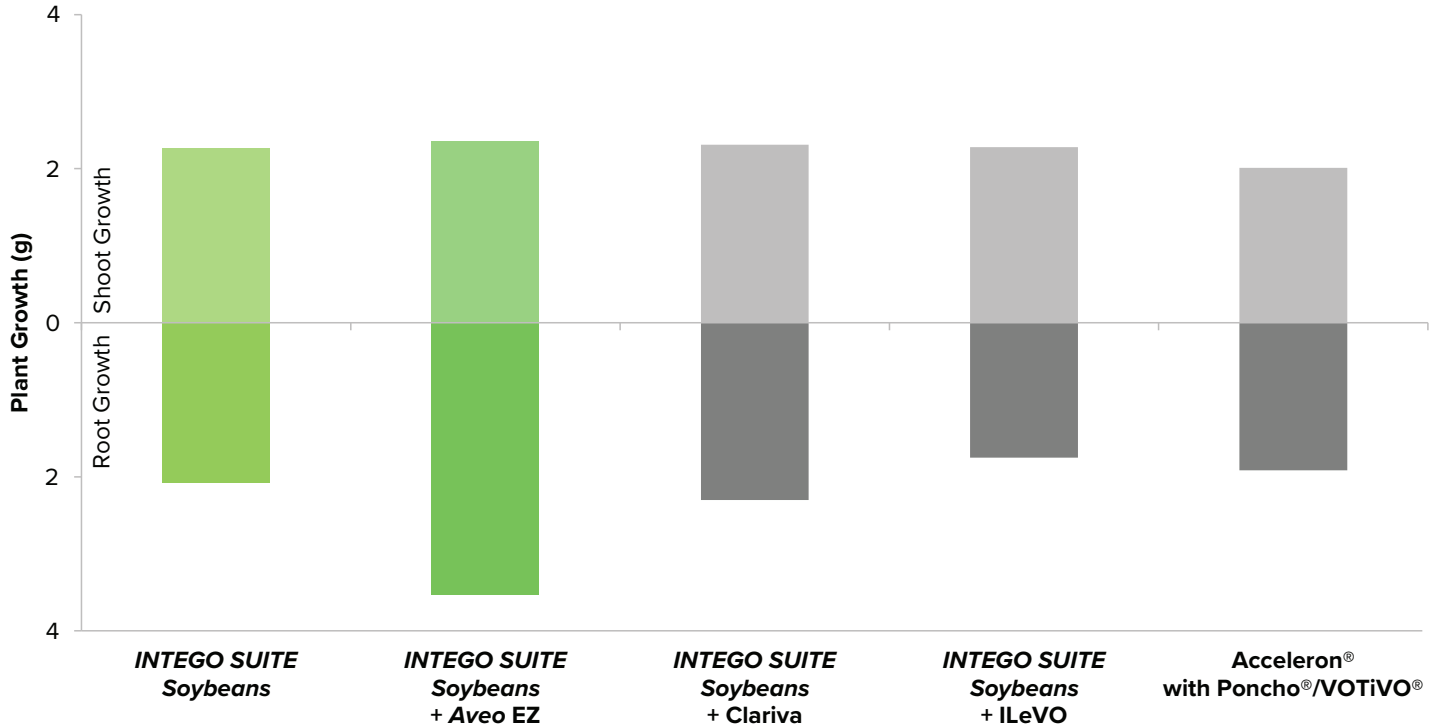

BA-1 in Aveo EZ colonizes soybean roots as they grow

Aveo EZ—Consistent Yield Performance Under Nematode Pressure

n=10

Aveo EZ Outperforms Competitors in SCN-Infested Soil

Six replications with a 7,000 eggs/100 cc of soil average.
Source: All-Tech, Inc.
