## Chateau<sup>®</sup> EZ Herbicide—A Proven, Long-Lasting Preemergence Herbicide for Established Alfalfa

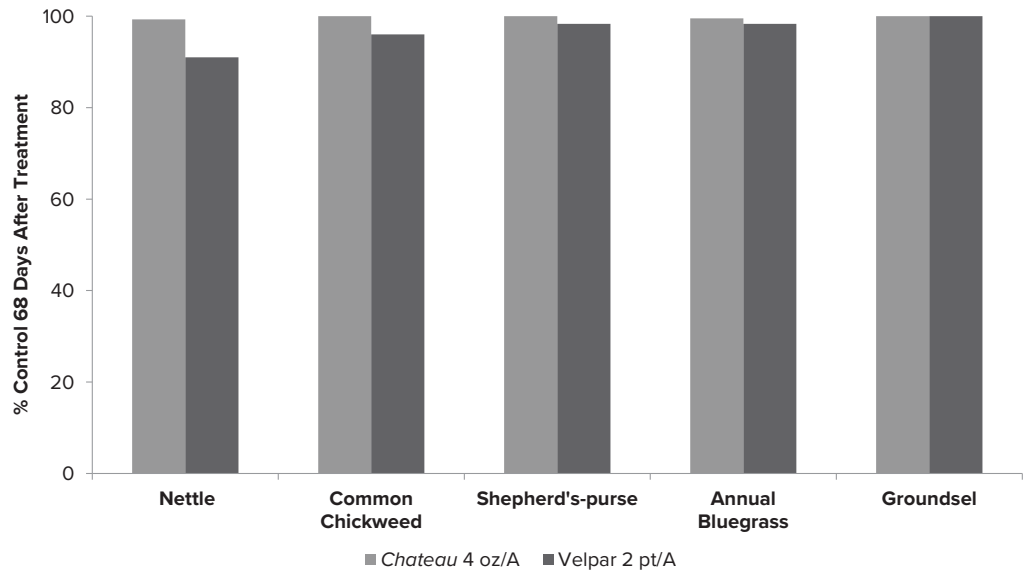

Alfalfa growers should start strong with a residual herbicide like Chateau<sup>®</sup> EZ Herbicide. *Chateau* EZ makes an excellent residual partner with glyphosate, Gramoxone<sup>®</sup> and other postemergence herbicides.

- ▶ **Chateau EZ** is a more convenient, **easy-to-use liquid formulation**
- ▶ **Broad Spectrum:** controls more than 90 tough weeds in alfalfa including groundsel, chickweed, shepherd's-purse, nettle and annual bluegrass
- ▶ **Long-Lasting:** stays where you put it; won't leach or co-distillate; no photodegradation
- ▶ **Weather-Ready:** remains active until ¼-inch rainfall or irrigation releases its activity

### Chateau—Broad Spectrum Control

*Chateau* provides proven control of tough weeds while providing superior rotational flexibility compared to Velpar<sup>®</sup>.

## How To Use

<b>Rate</b>	<p>4 fl oz/A</p> <ul style="list-style-type: none"> <li>• Do not apply more than 4 fl oz per acre per application</li> <li>• Do not make more than 2 applications per acre per year</li> <li>• Do not apply more than 8 fl oz per acre per year</li> </ul>
<b>Timing</b>	<ul style="list-style-type: none"> <li>• Apply after hay removal and before 6 inches of growth occurs</li> <li>• For best results, apply in fall before weeds emerge</li> <li>• <i>Chateau</i> EZ requires at least ¼ inch of irrigation or rainfall for activation</li> </ul>

## How To Use continued

<b>Method</b>	Ground or air. For best results, apply with ground spray equipment.
<b>Spray Volume</b>	10–30 gallons/A by ground
<b>Adjuvant</b>	Only apply with an adjuvant or tank mix with products formulated as an emulsifiable concentrate when targeting control of emerged weeds. Crop burn and/or stunting should be expected and accepted if <i>Chateau</i> EZ is used with an adjuvant, a tank mix partner formulated as an emulsifiable concentrate or a tank mix partner formulated with an adjuvant.
<b>REI / PHI</b>	12 hours / 25 days

## Other Important Information

- ▶ **Alfalfa is considered established if it has been cut at least one time**
- ▶ Do not apply within 25 days of harvest or grazing
- ▶ Wait at least 60 days between applications
- ▶ Not for use on intended mixed alfalfa-grass stands
- ▶ *Chateau* EZ may temporarily burn alfalfa leaves and stems
- ▶ Tank mix with Gramoxone and/or Velpar to burn down winter annuals prior to or during winter dormant period
- ▶ Clean spray tank immediately after using *Chateau* EZ. See label for details.
- ▶ Signal word: Caution. No respirator required.
