

The Standard for Scale Control

Esteem[®] 0.86 EC Insect Growth Regulator is the standard for scale control because only *Esteem* gives outstanding, long-lasting protection that is super selective and soft on beneficial insects.

- ▶ **Long-lasting**—one well-timed and proper application gives season-long control (always ensure adequate water volume and application speed/coverage)
- ▶ **Controls Scale**—including California red, brown soft scale, San Jose scale, black scale and Lecanium scale
- ▶ **Soft Chemistry**—*Esteem* has minimal impact on pollinators and beneficial insects and mites and a short REI gives grower quick access to groves and orchards

California Red Scale Life Cycle

Esteem Breaks the Scale Life Cycle

Esteem works by affecting all life stages of scale. *Esteem* inhibits the development of early stages. Plus, *Esteem* disrupts the reproduction cycle by sterilizing adults.

How To Use

Rate	16 fl oz/A. Maximum rate/year: 32 fl oz/A.*
Timing	<ul style="list-style-type: none"> • California red scale in citrus—apply when the majority of scale is in the white cap stage • For black scale in olives—apply after scale crawlers emerge
Method	Ground air blast equipment— <i>Esteem</i> is not systemic so application speed and coverage is the key to good control
Spray Volume	200–500 gal/A—adequate water volume is essential to good coverage
Adjuvant	Superior spray oil at 0.5–1%. Follow precautions on oil label to prevent injury to fruit.
PHI	<ul style="list-style-type: none"> • Citrus: 1 day • Olives: 7 days • Tropical and subtropical fruits: 14 days
REI	12 hours

*Please refer to label directions for specific crop rates and yearly maximums

Other Important Information
