

Botrytis Solution for the Highest Quality Fruit

Intuity[®] Fungicide is a strobilurin fungicide (FRAC group 11) with a unique spectrum of disease control. Unlike other strobilurin chemistries, *Intuity* delivers strong preventive activity against Botrytis bunch rot in grapes. Additionally, *Intuity* strengthens grape disease management programs by consistently suppressing powdery mildew on bunches and leaves. Its locally systemic activity delivers long-lasting residual control for optimal quality and yield.
