Brome, ripgut	Fiddleneck, tarweed	Purple Nutsedge	

How To Use

Rate	Dormant Pastures and Rangelands: Apply 0.75–1.33 oz/A Native Grasses and Conservation Reserve Program (CRP) Sites: Apply 1.33–2 oz/A <ul style="list-style-type: none">• Include a non-ionic surfactant (NIS) at 0.25% v/v• Use 10–50 gal/A (ground) or 5–15 gal/A (air)• Tank mix with 0.28–0.39 lb ae/A of glyphosate• Use no more than 2.66 oz/A per yea• Keep spray solution at pH 6–8
Timing	Apply when desirable grasses are dormant and a new flush of target weeds have emerged and are actively growing Target 1- to 3-leaf cheatgrass Weeds should not be mowed or grazed for two weeks before or after application
Rainfastness	Heavy rainfall soon after application (less than 2 hours) may wash this product off of the foliage and a repeat application may be required for adequate control
Crop Rotation/ Plant-Back Restrictions	For plant-back restrictions, refer to the <i>Outrider</i> label, section 10.3 crop rotation tables Areas with pH higher than 7.5 or less than 30 inches accumulated precipitation must conduct field bioassay as indicated on the label
