

ProGibb® LV Plus PGR—Low VOC Formulation

ProGibb® LV Plus Plant Growth Regulator Solution is a high-potency, low volatile organic compound (VOC) liquid gibberellin formulation designed to meet strict air quality requirements.

- ▶ Twice the concentration of active ingredient as ProGibb® 4% Plant Growth Regulator Solution, two grams active per fluid ounce
- ▶ Lowest emission potential (EP) liquid gibberellin product registered
- ▶ Non-flammable solvent system reduces storage and handling issues
- ▶ Smaller package footprint minimizes storage space and post-consumer waste
- ▶ National Organic Products (NOP) compliant for organic production
