

Valor® XLT Soybean Herbicide—Start Clean This Fall

Valor® XLT Soybean Herbicide offers growers two modes of action for proven, reliable control of tough weeds. Applying *Valor* XLT in the fall provides excellent control of marestail and other winter annual weeds. *Valor* XLT provides a strong residual herbicide foundation in the fall that:

- ▶ Provides consistent, long-lasting control with multiple modes of action
- ▶ Lowers insect pressure from reduced habitat
- ▶ Allows growers to plant earlier in the spring due to cleaner fields
- ▶ Decreases loss of moisture and nutrients due to weed competition

Valor XLT: Longer Lasting Fall Marestail Control

How To Use

Rate & Timing	Apply 3–5 oz in the fall after harvest in combination with 2,4-D, dicamba and/or glyphosate <ul style="list-style-type: none"> • For best results, apply another residual herbicide in the spring to control spring annual weeds, such as waterhemp and Palmer amaranth 	
Rotation Restrictions	Corn: 10 months • 18 months in the Southern Region if soil pH is 7.0 or greater	Wheat: 4 months
Other Information	For a composite soil pH of greater than 7.0, refer to <i>Valor</i> XLT label for proper rate selection
