Chateau[®] EZ Herbicide—Proven Preemergence Herbicide

Chateau[®] EZ Herbicide provides long-lasting, broad spectrum residual control of problem weeds in established highbush blueberries.

- ▶ **Chateau EZ** is a more convenient, **easy-to-use liquid formulation**
- ▶ **Broad Spectrum:** controls more than 50 broadleaf weeds and grasses, including chickweed, shepherd’s-purse, annual sowthistle and many other tough weeds
- ▶ **Long-Lasting:** stays where you put it; won’t leach or co-distillate; no photodegradation
- ▶ **Weather-Ready:** remains active until ¼-inch rainfall or irrigation releases its activity

How To Use

Rate	6–12 fl oz/A. Apply up to 12 fl oz/A during a 12-month period.
Timing	<ul style="list-style-type: none"> • Do not apply to highbush blueberries established less than 2 years unless they are protected from spray contact by non-porous wraps, grow tubes or waxed containers • Do not apply within 7 days of harvest • For best results, apply before weeds emerge in the fall. If emerged weeds are present, apply in a tank mix with a burndown tank mix partner.
Method	Direct a uniform band spray at the base of the bush. Avoid spray contact to foliage and green bark.
Spray Volume	Minimum of 15 GPA
Adjuvant	As required by tank mix burndown partner
REI / PHI	12 hours / 7 days

Other Important Information

- ▶ *Chateau EZ* requires at least ¼ inch of irrigation or rainfall for activation
- ▶ Clean spray tank out immediately after use. See label for details.

Herbicide Control Comparison

	Excellent	Good	Fair	Poor
