

Approved Surfactants For Use With League® Herbicide

League® Herbicide is an unprecedented early season, lead-off play against tough broadleaf, aquatic and sedge weeds. It offers solid preemergence residual control of yield-robbing weeds and will fit your herbicide program lineup.

- ▶ *League* strikes weeds as they emerge, providing unique residual control, and also offers postemergence control for best fit in your weed program
- ▶ **Controls tough rice weeds**, including jointvetches, hemp sesbania, Texasweed, morningglory, flat sedge, eclipta, yellow nutsedge and more
- ▶ Fit for use on conventional or Clearfield® rice

Product	Supplier	Minimum Use Rate	
		fl oz/100 gal	fl oz/A

Volare DC™ + UAN	Precision Laboratories, LLC	64 + 128	6.4 + 12.8

The addition of 28% or 32% UAN (urea ammonium nitrate) at 2% v/v is recommended to the listed surfactants (except for Dyne-A-Pak, PHASE II, SoySurf X-tra and Triple Play, which already contain UAN) and may enhance the activity of *League* when applied under some conditions. The addition of 28% or 32% UAN at 1% v/v to Airforce, Persist and Volare adjuvants is required when used with *League*. UAN is NOT a substitute for an approved adjuvant, but rather should be used in combination with one of the approved adjuvants.
