Belay[®] Insecticide—Targets Hard-To-Control Pests

Belay[®] Insecticide is a broad spectrum, long-lasting, fast-acting insecticide for hard-to-control pests in sweet potatoes. Manage below-ground and above-ground pests on sweet potatoes with *Belay* applied to the soil during ground preparation for planting as preplant incorporated (PPI), at transplanting or as a foliar treatment in-season.

- **Broad Spectrum**—*Belay* controls white grubs, including the exotic white grub, sweet potato weevil, aphid, leafhoppers, flea beetles and more
- **Fast-Acting and Long-Lasting**
 - Foliar: *Belay* kills on contact and has translaminar movement that quickly reaches pests where they feed
 - Soil: *Belay* is systemic, so it moves from roots to foliage to protect against feeding caused by yield-robbing insect pests, such as beetles and aphids. Soil applications of *Belay* can provide protection of tubers with direct contact on the pest or by ingestion.
- **Application Flexibility**—*Belay* can be applied preplant incorporated (PPI), in-furrow at planting or foliar in-season

Belay Insecticide Protects Tubers from Below-Ground Pests

Exotic White Grub Control in Sweet Potatoes

- All insecticide treatments applied preplant incorporated

How To Use—Foliar

| | |
|----------------------|--|
| Rate | 2–3 fl oz/A for aphids, flea beetles and leafhoppers |
| Timing | Threshold |
| Method | Ground |
| Spray Volume | Use sufficient water to achieve adequate coverage of foliage |
| Application Interval | 7 Days |
| PHI | 14 Days |

How To Use—Soil

| | |
|--------------|--|
| Rate | <ul style="list-style-type: none">• 9 fl oz/A for aphids, flea beetles and leafhoppers• 12 fl oz/A for exotic white grubs control and wireworm suppression |
| Timing | Prior to or at transplanting |
| Method | <ul style="list-style-type: none">• Preplant incorporated for exotic white grubs and wireworms• Preplant incorporated or in-furrow for aphids, flea beetles and leafhoppers |
| Spray Volume | Use sufficient carrier volume to ensure uniform application |
| PHI | At transplanting application only |

Other Important Information

- Signal word: Caution
- REI: 12 hours
- Formulation: 2.13 SC
- To reduce the risk of generating resistance, alternate from Group 4 classes of chemistries to a different mode of action between applications
- *Belay* is compatible with commonly used tank mixes. Always follow mixing order and compatibility testing instructions. Maintain agitation when mixing and applying *Belay*.
- Do not apply more than 12 fl oz (0.2 lb ai) of clothianidin (the active ingredient in *Belay*) per acre per season
