

| Established Highbush Blueberries |

Preemergence Herbicide for Blueberries

Chateau® Herbicide SW provides long-lasting, broad spectrum residual control of problem weeds in established highbush blueberries.

- ▶ **Long-Lasting:** one treatment offers weeks of residual control in established blueberries
- ▶ **Broad Spectrum:** controls more than 50 broadleaf weeds and grasses, including chickweed, shepherd's-purse, annual sowthistle (except California) and many other tough weeds
- ▶ **Farm-Friendly:** won't leach or co-distillate

How To Use

Rate	6–12 oz/A. Apply up to 12 oz/A during a 12-month period.
Timing	<ul style="list-style-type: none"> • Do not apply to blueberries established less than 2 years unless they are protected from spray contact by non-porous wrap, grow tubes or waxed containers • Do not apply within 7 days of harvest • For best results, apply before weeds emerge in the fall. If emerged weeds are present apply in a tank mix with a burndown tank mix partner.
Method	Direct a uniform band spray at the base of the bush. Avoid spray contact to foliage and green bark.
Spray Volume	Minimum of 15 GPA
Adjuvant	As required by tank mix burndown partner
REI	12 hours

Other Important Information
