

Scout™ Herbicide: Dependable, Postemergence Control of Tough Weeds

Scout™ Herbicide delivers excellent postemergence control of glyphosate-resistant weeds like Palmer amaranth, marestail, waterhemp and kochia in LibertyLink® traired crops.

- ▶ **Dependable**—Unique mode of action (Group 10) delivers fast, effective control of emerged Palmer amaranth and waterhemp, including glyphosate-resistant biotypes
- ▶ **Flexible**—Can be used on glufosinate-tolerant corn, cotton or soybean crops, and tank mixed with many post-applied residual herbicides
- ▶ **Full-season control**—Start with a strong residual herbicide such as Valor® or Fierce® brands and then follow with *Scout* to manage tough and resistant weed populations throughout the season

Using Scout Following an Application of Fierce Outperforms Competitors

Note: Fierce 3 oz/A is equivalent to Fierce EZ 6 fl oz/A. Ragweed data is average of 3 trials. Waterhemp data is average of 4 trials. Both are a combination of university and internal trials.

How To Use

SKU Information	265-gallon tote for cotton and soybeans
Early-Season Control	Use a labeled rate of a strong residual preemergence herbicide, such as <i>Fierce</i> EZ 6–7.5 fl oz/A or <i>Fierce</i> MTZ 1–1.25 pt/A
Rate	<ul style="list-style-type: none"> • First <i>Scout</i> postemergence application—32 fl oz/A • Second <i>Scout</i> postemergence application (if needed)—32 fl oz/A
Adjuvant	AMS 1–3 lb/A
Timing	<ul style="list-style-type: none"> • First <i>Scout</i> application—weeds 3 inches or smaller • Second <i>Scout</i> application—21 days after first application
Tips	Applications are most effective when made between 2 hours after sunrise to 2 hours prior to sunset
