

Get the Most Out of Your Lep Control Program

Top vegetable growers know that the proven performance of XenTari® Biological Insecticide Dry Flowable will get them to the finish line for season-long worm control. *XenTari* is an excellent tool when the challenge is armyworm or diamondback moth. It helps preserve valuable beneficial populations and prevent insect pressure from building up early, giving beneficials a chance to flourish. Incorporating *XenTari* into a rotation or tank mix with other insecticides is shown to improve field performance and reduce costs.

- ▶ **Effective**—Kills even the most difficult worm pests
- ▶ **Sustainable**—Easy on beneficial insects and fast re-entry
- ▶ **Superior Formulation**—Advanced DF formulation means easy and effective mixing with optimal coverage and better control
- ▶ **Confidence**—Quality and consistency from batch to batch

Manage Hard to Control Worms with *XenTari*

Effective and economic control of a broad spectrum of difficult to control lep pests

Crop: Tomatoes
 Insects: Beet armyworm, tomato fruitworm, tomato pinworm
 Source: Trumble; University of California, Riverside, CA

How To Use

Rate	Apply 1–2 lb/A. Use the higher label rate under heavy pest pressure.
Timing	Apply when larvae are small and actively feeding. Repeat as needed up until harvest.
Method	Ground—use overhead and drop nozzles to obtain good coverage
Spray Volume	Coverage is key to control. Use sufficient spray volume to cover all sides of plant surfaces.
Adjuvant	Use a spreader-sticker for hard-to-wet crops or to improve weather-fastness
REI	4 hours
PHI	0 days—no restrictions
