

## Chateau® Herbicide SW—Preemergence Residual Herbicide

- ▶ **Broad Spectrum:** controls **more than 90** annual broadleaf and grass weeds, including marestail, fleabane, mallow, filaree, annual ryegrass and other annual grasses
- ▶ **Long-Lasting:** extended residual broadleaf and grass weed control
- ▶ **Farm-Friendly and Weather-Ready:** registered for use on recently planted orchards, *Chateau* stays where you put it; won't leach or co-distillate; no photo-degradation; remains active until ¼-inch rainfall or irrigation releases its activity

### How To Use

<b>Rate</b>	6–12 oz/A (up to 24 oz/A per year). For best results, apply with a burndown herbicide.
<b>Burn Down</b>	Use the highest label rate of Scout™ Herbicide, Roundup®, Cheetah®, Rely®, Treevix™ or Gramoxone®
<b>Timing</b>	Apply after final harvest in fall and before bud break in the spring. For best results, apply in the fall before winter rains and prior to second flush of weed emergence in late winter in California. Apply twice per season for maximum residual weed control.
<b>Method</b>	Apply a uniform broadcast spray. Direct spray to the orchard floor and the base of tree trunks. Ensure uniform coverage across the entire berm.
<b>Spray Volume</b>	Minimum of 15 gallons of spray solution per acre
<b>Adjuvant</b>	Per recommendation of tank mix partner
<b>REI / PHI</b>	12 hours / 60 days
<b>Signal Word</b>	Caution

### Other Important Information—See Label for Complete Information

- ▶ Other tree nuts on label: beechnut, betelnut, Brazil nut, butternut, cashew, chestnut, chinquapin, coconut, ginkgo, heartnut, hickory nut, macadamia nut, oak, pili nut, pine nut and tropical almond
- ▶ Do not apply to trees established less than one year, unless protected from spray contact
- ▶ Apply a maximum of 6 oz/A per application on any soil that has more than 80% sand plus gravel content if trees are less than 3 years of age
- ▶ Follow instructions for spray tank clean out immediately after use. See label for details.
- ▶ In certain areas in Merced, San Joaquin and Stanislaus counties, almond growers must follow specific timing, soil type, pH and moisture requirements. Please follow supplemental label instructions and refer to Valent technical bulletin “Important Notice for Almond Growers.”
