

Senstar® Insecticide: Boost Your Insect Control

NEW Senstar® Insecticide brings two effective modes of action for fast, long-lasting control of soft-bodied insects including, scales (**California red scale**), psyllids (**Asian citrus psyllid**) and aphids. With contact, translaminar and systemic activity that affects all life stages of targeted pests for long-lasting control, *Senstar* helps ensure high-quality fruit from the start.

- ▶ Controls target pests at all life stages, including eggs
- ▶ Provides dual systemic activity to control pests moving into new vegetative growth as well as pests which populate in already developed foliage
- ▶ Delivers fast translaminar movement to reach target pests that feed on the underside of leaves
- ▶ Selectively targets harmful insect pests with minimal impact on beneficial arthropods

Senstar Controls First Generation Red Scale

California Red Scale Control on Navel Oranges

Senstar applied at the first generation red scale crawler stage delivers cleaner fruit compared to Esteem® 0.86 EC Insect Growth Regulator or Movento®.

Means followed by the same letters are not significantly different ($P \leq 0.10$)

Source: Sawtooth Ag

How To Use

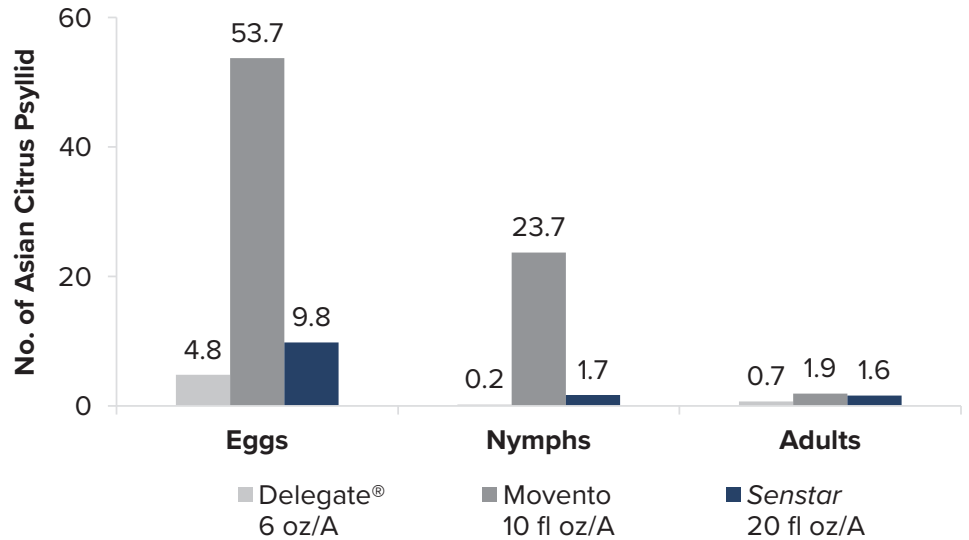

Rate	16–20 fl oz/A
Timing	Apply when pests are just beginning to build and before infestation
Method	Ground application
Spray Volume	200 gal/A (higher water volumes may provide improved insect control)
PHI / REI	1 day / 24 hours

Senstar Delivers Powerful Control at All Life Stages

Asian Citrus Psyllid Control on Navel Oranges

Senstar delivered superior control of Asian citrus psyllid at all life stages compared to Movento.

Three days after application

Better Crops, LLC

Other Important Information

- ▶ Do not apply more than 20 fl oz/A per application
- ▶ Do not make more than two applications per year
- ▶ Do not apply more than 40 fl oz/A per year
- ▶ Minimum interval between applications is 21 days
- ▶ Do not apply this product within 10 days prior to bloom, during bloom or until petal fall is complete
- ▶ Do not apply nonionic surfactants in tank mix combination on white grapefruit

Integrated Pest Management (IPM)

Senstar is highly suited for use in IPM programs because it shows high selectivity to harmful insect species with no hazardous effects on many beneficial insects.
