

Senstar™ Insecticide: Boost Your Insect Control

NEW Senstar™ Insecticide brings two effective modes of action for fast, long-lasting control of soft-bodied insects including, Asian citrus psyllids, aphids and scales. With translaminar and systemic activity that affects all life stages of targeted pests for long-lasting control, *Senstar* helps ensure high-quality fruit from the start.

- ▶ Controls target pests at all life stages, including eggs
- ▶ Provides dual systemic activity to control pests moving into new vegetative growth as well as pests which populate in already developed foliage
- ▶ Delivers fast translaminar movement to reach target pests that feed on the underside of leaves
- ▶ Provides high selectivity to harmful insect species with no hazardous effects on many beneficial insects for excellent fit in Integrated Pest Management (IPM) programs

Senstar Delivers Powerful Control at All Life Stages

Senstar delivered superior, long-lasting control of citrus leafminers compared to *Esteem* or *Movento*.

21 days after application

Means followed by the same letters are not significantly different ($P \leq 0.10$)

How To Use

Rate	16–20 fl oz/A
Timing	Apply when pests are just beginning to build and before infestation
Method	Ground application
Spray Volume	100–350 gal/A (higher water volumes may provide improved insect control)
PHI / REI	1 day / 24 hours

Other Important Information

- ▶ Do not apply more than 20 fl oz/A per application
- ▶ Do not make more than 2 applications per year
- ▶ Do not apply more than 40 fl oz/A per year
- ▶ Minimum interval between applications is 21 days
- ▶ Do not apply this product within 10 days prior to bloom, during bloom or until petal fall is complete
- ▶ Do not apply nonionic surfactants in tank mix combination on white grapefruit

Integrated Pest Management (IPM)

Senstar is highly suited for use in IPM programs because it shows high selectivity to harmful insect species with no hazardous effects on many beneficial insects.
