## Top 10 Reasons to Use Perpetuo<sup>®</sup> Herbicide

1

**Burndown and Residual Control:** Perpetuo<sup>®</sup> Herbicide is a premix of proven chemistries (flumiclorac pentyl and pyroxasulfone) with both burndown and residual weed control.

2

**More Activity:** Pyroxasulfone is the newest molecule in its chemical group and works on more sites of action in plants than other Group 15 herbicides.

3

**Enhanced Broadleaf Control:** *Perpetuo* will strengthen the overall broadleaf spectrum of control with tank mixes of broad spectrum burndown herbicides.

4

**Increased Flexibility:** *Perpetuo* allows flexible application at a convenient low use rate and can be applied up to V6 in soybeans.

5

**Faster Acting:** *Perpetuo* needs very little water to activate, making it more effective and providing faster residual control than encapsulated products.

6

**Increased Crop Safety:** No antagonism with Select Max<sup>®</sup> Herbicide with Inside Technology<sup>™</sup> and other clethodim products.

7

**Extended Residual Control:** Utilizing *Perpetuo* as an overlapping residual will extend the residual control of waterhemp and Palmer amaranth to canopy.

8

**Broader Postemergence Control:** *Perpetuo* will provide control of velvetleaf and helps in the control of vine-type weeds like morningglory.

9

**Buy Now, Pay Later:** Now available for grower financing through John Deere Financial for 0%.
