Fierce® Herbicide: Start the Season Strong with Multiple Modes of Action for Tough Control

Fierce® Herbicide has two effective modes of action to give winter wheat fields a strong start and protect yields. Get up to eight weeks of powerful broad spectrum control over tough and resistant weeds and grasses, including Italian ryegrass, chickweed and marestail with Fierce.

Fierce:

- Protects fields with residual control for up to 8 weeks
- Contains two effective modes of action for proven control of tough and resistant weeds and grasses like Italian ryegrass, marestail, henbit and chickweed
- Excellent residual control of ALS-, ACCase- and/or glyphosate-resistant Italian ryegrass
- Effective control at a low use rate
- Rotational flexibility following winter wheat to crops like corn, soybeans and tobacco

Fierce Control of ALS-Resistant Common Chickweed

| Untreated | Fierce 3 oz/A  
(applied 14 days prior to planting wheat) |

## How To Use

<table>
<thead>
<tr>
<th><strong>Rate</strong></th>
<th>3 oz/A (do not apply more than 3 oz/A per application or per year)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Target Control</strong></td>
<td>Medium- to small-seeded broadleaf weeds and annual grasses</td>
</tr>
<tr>
<td><strong>Timing</strong></td>
<td>Apply 14 days prior to planting no-till or minimum till winter wheat where the previous year’s crop residue has not been incorporated into the soil</td>
</tr>
</tbody>
</table>

## Other Important Information

- Plant winter wheat at least 1 inch deep or injury may occur
- Do not apply to winter wheat that is planted conventional till or that is broadcast
- Rainfall of at least ½ inch within 10 days of application is necessary for herbicide activation and good weed control
